Task	Effort
1) Set Up Version Control	2h
2) Set up domain name	2h
3) initial plannineg	**6h**
3.1) Write Project Concept	3h
3.2) Write 1st Iteration Plan	3h
4) get acquainted with EJB	**6h**
4.1) Write EJB Toy	4h
4.2) Explain Toy to rest of users (pair-to-pair)	2h
5) interfacing and testing	**1d**
5.1) write interface & tests for message parser / from/t…	2h
5.2) backend interfaces / tests	**6h**
5.2.1) write interface & tests for User object	2h
5.2.2) write interface & tests for User's nicknames	2h
5.2.3) write interface & tests for backend object	2h
6) First Iteration 1st project report	3h
7) implementation	**1d 1h**
7.1) implement parser	1.5h
7.2) implement user object	1.5h
7.3) implement user's nicknames	2h
7.4) implement backend (bill object)	4h
8) First Iteration 2nd Project report	3h
9) Figure out emailing	**1d 4h**
9.1) figure out ejb email sending	2h
specifically to SMS email addresses, ie 6462294050@vtext.com	
9.2) figure out ejb email receiving / parsing	6h
9.3) integrate with backend	4h
10) First Iteration Final Report	3h
11) Code Inspections	3h
12) 2nd Iteration Plan	3h
13) Refactoring	1d
14) 2nd Iteration Progress Report	2h
15) deploy to internet	3h
16) JSP / HTML Front end	**1d 1h**
16.1) login user html front-end	3h
16.2) bill history html front-end	3h
16.3) new bill html frontend	3h
17) 2nd Iteration Demos	4h
18) 2nd Iteration Final Report	4h
